

TAKE A WALK ON THE WILD SIDE

HOW ANIMALS MOVE IN AND AROUND VERMONT

A MULTIMEDIA PRESENTATION BY STEVE TROMBULAK, Ph.D.

Wednesday, November 14, 2018

7:00-8:30 pm

Bingham Memorial School

112 School Road (Rte 30)

Cornwall, VT

Vermont is home to many wildlife residents as well as migratory visitors. For wide-ranging animals, moving safely around and through the landscape is key to their survival.

Join Middlebury College biologist Steve Trombulak as he describes how different species move through and over our landscape, and how wildlife corridors and connectivity habitat shape the region's ecology.

An energetic, experienced and engaging educator, Steve will also present land management strategies for maintaining wildlife in the regional ecosystem.

Sponsored by the Cornwall Conservation Commission and the Cornwall Trust for Public Funds.

Steve Trombulak, Middlebury College Professor of Biology and Environmental Studies

FREE AND OPEN TO THE PUBLIC!
