MEMORANDUM

To: Ron LaRose, LS

Date: 7/29/2022

From: Dori Barton

Re: 625 Vermont Rte 30, Cornwall: Wetland Review

Ron,

The purpose of this memo is to document the findings of my site visit to the above referenced property on July 22, 2022. As we discussed, I reviewed the proposed development areas as well as the field to the west of the existing residential structure and driveway.

The site review was focused on identifying wetland resources. The protocols put forth in the USACE's *Corp of Engineers Wetlands Delineation Manual* (2009 Regional Supplement for the Northcentral and Northeast Region) were employed for delineating wetlands as is the standard practice in Vermont. The project area is characterized as open field and forested plantation.

AE confirmed the absence of wetland resources in and adjacent to the Project area.
